# Fix names in a Table

You are given a table named "Names" that contains a column named "Name" which stores the names of individuals. However, the names in this column have some inconsistencies, such as incorrect capitalization or spacing errors.

Your task is to fix these issues and update the table with the corrected names.

**Names:**

| Name |
| --- |
| rAVI kUMAR |
| priya sharma |
| amit PATEL |
| NEHA gupta |

Output:

| Name |
| --- |
| Ravi Kumar |
| Priya Sharma |
| Amit Patel |
| Neha Gupta |

## SQL Code

CREATE TABLE NAMES(

Name varchar(25));

insert into NAMES(Name)

VALUES

('rAVI kUMAR'),

('priya sharma'),

('amit PATEL'),

('NEHA gupta');

select * from names;

```sql
select initcap(name) from names;
```
